GRG ATMs Remote Key Loading Certified Using TSS's A98 ATM Key Management System

Charlotte, NC – July 31, 2015 – Working together with GRG International's US headquarters in Mississippi, Trusted Security Solutions, Inc. has successfully completed remote key loading testing and certification with GRG ATMs using their A98 ATM Key Management System.

This announcement paves the way for GRG ATM owners to use remote key loading to establish the initial encrypting key into their ATMs versus having two people visit each ATM and manually enter the key using paper components.

"Many of our clients have expressed interest to use remote key loading technology in keying their ATMs because it is easier to maintain compliance this way and saves time and money," says GRGI Chief Technical Officer, Bill Jackson. "We appreciate the professional assistance provided by TSS in certifying remote key loading on our ATMs and will move forward to assist our customers and the financial processors driving our ATMs in their certification process."

GRGI is the representative of GRG products in the United States for GRG Banking Equipment Company, Ltd. GRG Banking is headquartered in Guangzhou, China is the No. 1 ATM supplier in China and a top 6 player in the global market.

Trusted Security Solutions, Inc., a leading provider of secure ATM key management solutions, is headquartered in Charlotte, North Carolina, USA, For more information on the A98 ATM Key Management Solution, visit www.trustedsecurity.com.
